WASTEWATER SOLUTIONS

CST NEWS

Member of the Global Water Alliance, committed to green energy and clean water

25 years experience in quality cost-effective waste water and green energy solutions

> World first opens door to global gains in green energy from food processing

A world first in the conversion of food processing pulp waste to produce greater quantities of green energy has been successfully...*for more*

> High-efficiency Rotary Screen advances 21st Century solids removal

CST Wastewater Solutions has introduced its latest-technology Rotary Drum Screen for high efficiency screening of industrial...*for more*

## NEWS FLASH

> Major advances in fine grit removal engineering to be highlight of Ozwater '13

Advanced Smith & Loveless grit removal technologies strongly relevant to Australian wastewater treatment plants will be presented by CST Wastewater Solutions to the Ozwater '13 international water conference and exhibition in Perth from May 7-9.

> Multi-million yearly benefits flow to early adopters of green energy from waste

Early adopters of anaerobic technology used to convert waste water into green energy are now reaping millions of dollars a year in...*for more*

> National Water Security supernatant recycling project chosen as Finalist in National Endeavour Awards

A supernatant recycling system that helps to conserve potable water and provide substantial water savings over the long term...*for more*

Presentation of the technologies follows a recent educational initiative by CST Wastewater Solutions and Smith and Loveless, which partnered to host a series of grit seminars earlier this year focussing on grit removal, testing, pumping and dewatering.

The seminars were well attended by the Australian professional engineering community, and discussed the latest developments in grit removal system design, technology advancements and performance...*for more...*
