NEWS FLASH

> **Underperforming waste lagoons move into the environmental risk management spotlight**

Underperforming open industrial waste water treatment lagoons are on the way out after more than a century, as industry counts the cost of their pollution, odours, leakage, energy wastage and relative inefficiency in fixing the problems they set out to address.

The advent of increasingly global carbon taxes, community activism, and increased legislative awareness of environmental shortcomings are driving change that will see industry searching for better ways to reduce problems created by effluent from uncovered lagoons.

Food and beverage processors will be in the front line of change, along with primary processors, including meat and dairy...*for more...*
