CST Wastewater Solutions

in quality cost-effective waste water and green energy solutions

- > New CST packages eliminate the jigsaw of complexity and costs in waste water, recycling and green energy sustainability projects
- > Low maintenance waste water project demonstrates widely applicable efficiency and OHS gains with CST wastewater technology

New engineer-and-build water and waste water treatment and recycling packages are being introduced by CST Wastewater Solutions for industries and municipalities that want to lower the cost... for more

High efficiency fine screening technology engineered to deliver low maintenance performance with reduced OHS hazards for municipal and industrial waste water schemes is demonstrating... for more

- > Latest anaerobic and water recycling technology to feature at CST's Food Technology Queensland stand F30 this June
- > Waste technologies transform problems to profit as water innovators combat the twin impact of drought and pollution

Leading exponents of locally and globally successful wastewater-to-energy projects for agribusiness and industry will feature on the CST Wastewater Solutions stand F30... for more

Anaerobic digestion processes that radically improve the quality of waste water while delivering green energy extracted from biological waste streams are emerging as a profitable... *for more*

NEWS FLASH

Australasian management strongly supports environmental initiatives – but wants a solution to the gap between promise and performance

A new study of Australian management attitudes towards environmental initiatives involving cleaner water and greener energy has found strongly increasing support among the people who are key to making such projects happen.

The study, commissioned by CST Wastewater Solutions, finds industry is convinced about the potential financial viability of sustainable energy and water initiatives, if sanguine about the failure rate in Australia and New Zealand so far.

"100% of our respondents strongly or somewhat agree that they are "passionate" about sustainability. We were expecting ambivalence around attitudes emanating from Chief Financial Officers and found some, though we found less ambivalence than expected. Over 90% of respondents believe their CFO is receptive to sustainability initiatives with a strong cost justification," for
